

Join Us For **FREE Virtual Professional Development** on Google's **CS First & Applied Digital Skills** Curriculum!

July 8, 2020 10:00 a.m. - 12:00 p.m. EST - CS First

July 22, 10:00 a.m. - 12:00 p.m. CST - Applied Digital Skills

In these FREE virtual professional development workshops, school librarians will learn how to use CS First and/or Applied Digital Skills. **CS First** is Google's free, ready-to-teach, introductory computer science (CS) curriculum. **Applied Digital Skills** is Google's free online curriculum which prepares students of all ages for the growing number of jobs that require basic digital skills. As part of both programs, Google has created an entire curriculum, along with all the necessary lesson plan resources, to help educators teach these essential skills to students.

During the virtual workshop, school librarians will:

- **Learn** about the program, the goals, design, and the "why" behind each
- **Review** the curriculum
- **Experience** some of the highlights of the program through guided exploration
- **Reflect** on how you may implement or share this program

How can these programs help you in your library?

- **Ready-To-Use** content is already created and teacher resources are provided to support you when getting started with both Applied Digital Skills & CS First.
- **Applicable** for all content areas and across many grade levels (3-12 for Applied Digital Skills and 4-8 for CS First).
- **Student-Paced** curriculum driven by video instructions for students to complete at their own time and pace.

Join us and join the growing community of educators from across the country utilizing Applied Digital Skills & CS First in their classrooms & libraries!
